DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 3/15/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. With regards to documents A14 through A18, applicant has only provided a translation of the abstract and copy of a figure. Applicant has not provided a complete copy of the documents.

Claim Objections

Claim 11 is objected to because of the following informalities: It appears that the phrase "in such a way that only an input and output" in lines 3 and 4 of the claims has been repeated. Claim 11 is also objected to because it is not in the form of a single sentence. (see period at lines 5 and 6) Claims 13,15,17,19 are objected to because of the following informalities: Claim 13 depends upon itself. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2817

In claim 20, applicant recites the limitations "a root of two impedance" , "a characteristic root of two impedance" and "the root of two". Is applicant taking the square root of these impedances?

Examiner is also unclear what two impedances applicant is referring to in lines 8 and 12 of claim 11?

The term " FET transistor, HEMT transistor or PIN diode types of switches" in claims 13 and 14 is a relative term which renders the claim indefinite. The term "Pin diode types" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
